

Bodicool Breast Form

TruCool Gel – a Trulife proprietary silicone blend - features advanced cooling technology.

Cooling cushions with TruCool Gel provide raised contact points that promote air circulation and maximum comfort.

Full coverage of the soft TruCool Gel provides maximum contact and delivers an advanced cooling effect.

Advanced WAVE design promotes air circulation between the chest wall and breast form, enhancing the cooling effect.

The Technology Behind BodiCool

The yellow and red areas of the thermal imaging indicate warm temperatures on a standard lightweight silicone breast form (left) in contrast to the cool colors, mostly blue and green, on a BodiCool WAVE breast form (right).
